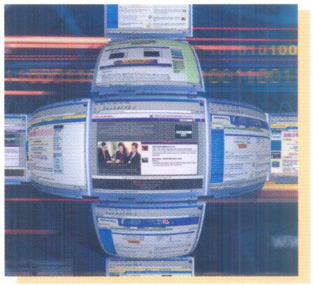
- Operates in network environments.
- Single and multi user versions.
- Arabic, English and inter mixed applications.
- Password security.
- e-Business capability.
- Customized to accommodate your needs.



## 2 Soft Systems Benefits:

- **Improve efficiency** – by simplifying business processes and eliminating multiple system redundancy, your staff will perform better and free up for additional responsibilities.
- **Intelligent decision making** – by providing a steady flow of analytical information that covers your entire business in real time.
- **Reduce expenses** – by eliminating double entry into multiple systems, staff requirements are reduced for the same volume of business.
- **Better planning and forecasting** – analytical tools and wizard help you forecast, play financial what if scenarios, and get you through otherwise complex planning processes.
- **Enhanced communication** – with automated, paper less flow of information between departments
- **Increase accuracy** – an integrated system will eliminate mistakes associated with double entry of information across discrete systems.
- **Improve reliability** – the sophisticated client/server technology (Sybase SQL) eliminates data corruption caused by workstation malfunctions.
- **Simplified management** – all your business information accessible through a single, easy to use system.
