Tickets Sales & Accounting (Travel Agencies)

Tickets Sales & Accounting system is designed to control ticket stock, sales and accounting requirements for travel agents. This system interfaces efficiently to the accounting system performing the tickets sales & cost accounting for single \ multiple branches. It handles normal & cut fare tickets, overriding commission and special tour operation(optional). The system allows processing of tickets purchased through other travel agents. Single user and multi-user versions are available. It operates in local area network environments (LAN). It is supported by our Target Locking data recovery system. Ticket Sales & Accounting System is available in Arabic and English versions.
