Student Registration & Accounting

Flexible, scalable, powerful student registration solutions

2 Soft Systems is well known for its ease of use and depth of features for any school (is intended for English or Arabic private schools to increase the overall level of organization and efficiency).

Our **Student Registration & Accounting** software module is a Windows based program designed to quickly and easily register students for classes. It gives you the management and administrative reports you need to effectively manage your program, and is fast, reliable and easy to use, as well as incredibly simple to learn.

Student Information & Accounting System is designed to manage student's data and their financial accounting status. It handles student registration, bus registration, school and bus accounting. It supports next year school/bus registration, deposits, class and bus allocation. This system supports multiple departments and can control each department separately.

The program is based on advanced relational data base technology (Sybase Adaptive Server Enterprise, SQL) and provides maximum flexibility, ease of use and performance. Student Registration & Accounting System include recovery program (Target Locking) for data recovery. Customers may order the Arabic or English version. Either option may be ordered in Single/Multi users, and runs on Windows 98, 2000, XP, 2000/2003 Servers (NT Technology).

MAJOR SYSTEM FUNCTIONS

- Current Year Information
 - School/Bus registration and School/Bus accounting.
- School Registration
 - Allows adding, updating, deleting and viewing students data which include information about the student, family, school, accounting status, ect.
- Bus Registration
 - Allows adding, updating and deleting students using buses. The system handles registration for buses in the morning/afternoon as well as for various distances traveled.
