Delivery Notes

Facilitate innovation and improve operation

2 Soft Systems Delivery Notes is designed to update online, the inventory stock during credit sales/returns data entry and generate the necessary sales accounting automatically.

It is an add on feature to the full integrated inventory and accounting system and will not run by itself (work with inventory control System).

The program is based on advanced relational data base technology (Sybase Adaptive Server Enterprise SQL) and provides maximum flexibility, ease of use and performance. Factory Production may be used stand alone or integrated with the other application of the complete office automation system (Accounting & Inventory). The Factory Production include recovery program (Target Locking System) for data integrity. Customers may order the Arabic or English version. Either option may be ordered in Single/Multi users, and runs on Windows 98, 2000, XP, 2000/2003 servers (NT Technology), using Sybase & PowerBuilder.

System Functions

- Data entry services for credit sale of stock items.
- Fully compatible with Inventory reporting facilities.
